Lee is a good looking slender youngster. He appeared alert and generally well motivated throughout the test situation, exhibiting some apprehensiveness.

He achieved an I.Q. of 118 on the Wechsler Intelligence Scale for Children (abb.) indicating present intellectual functioning in the upper range of bright normal intelligence. All his scores were above the average for his age group, appreciably so in the verbalization of abstract concepts and in the assembly of commonly recognizable objects. His method of approach was generally an easy, facile and highly perceptive one. Although presumably disinterested in school subjects he operates on a much higher than average level.

Lee achieved a 7.9 grade level in reading rate and 7.5 grade level in comprehension suggesting no retardation in this area. In the area of arithmetical reasoning he is above the average for his age group.

The Human Figure Drawings are empty, poor characterizations of persons approximately the same age as the subject. They reflect a considerable amount of impoverishment in the social and emotional areas. He appears to be a somewhat insecure youngster exhibiting

much inclination for warm and satisfying relationships to others. There is some indication that he may relate to men more easily than to women in view of the more mature conceptualisation. He appears slightly withdrawn and in view of the lack of detail within the drawings this may assume a more significant characteristic. He exhibits some difficulty in relationship to the maternal figure suggesting more anxiety in this area than in any other.

Under conditions of emotional stress and strain he appears increasingly defensive suggesting some concern orally and in general incapable of constructing an effective ego-defense.

SPECIAL BEHAVIOR REPORT RE: Lee Oswald (3 digit number illegible)

Written by Mr. Rainey

Lee has constituted a problem here of late. He is a non-participant in any activity on the floor. He has made no attempts at developing a relationship with any number of the group and at the same time, not given any one an opportunity to become acquainted with him. He appears content just to sit and read whatever is available. He has reacted favorably to supervision; does what is asked of him without comment. There appears to be nothing on the floor of interest to him. Each evening at 8:00 PM he asks to be allowed to go to bed. Members of the group appear to respect his seclusiveness. Perhaps this boy should have a talk with his Case Worker. perhaps he will become more communicative from this point.
